DETAILED ACTION

Drawings

Because of applicant's amendments to the specification, the drawing objections of the prior office action are withdrawn.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. Applicant has amended the claims to require a structure wherein when nothing is mounted to the stub, the inlet and outlet ports of the filter head are still in fluid flow communication. However, as shown in his drawings and explained in paragraph [0006], it is the filter mounted to the stub that provides fluid communication between the ports. When nothing is mounted to the stub, no fluid communication can exist. Applicant's new limitation added to the claims is not supported by the application as originally filed and is considered to be new matter.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1723

Because of applicant's amendments to the claims, the 112 rejections of the prior office action have been withdrawn however his amendment has created the following new 112 rejection.

4. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are indefinite because of the following reasons:

- Applicant's claims originally required a filter to be mounted to the stub in order to provide fluid communication between the inlet and outlet ports of a filter head; but now because of his amendment to the independent claims, the claims also additionally require a configuration wherein when nothing is mounted to the stub, fluid communication is still provided between the inlet and outlet ports of a filter head. Such conflicting limitations render the claim indefinite.

Claim Rejections - 35 USC § 103

Because of the conflicting limitations within each of the amended independent claims, a structure as now claimed cannot be envisioned such that a proper comparison with the prior art is precluded. Therefore, for examination purposes under 103, the independent claims are taken as being in originally-presented form (not having the new limitation) and the rejections under 103 of the prior office action have not changed.

Response to Arguments

5. Applicant's arguments with respect to claims have been considered but are moot in view of the new grounds of rejection under 112.

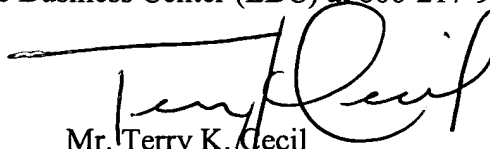

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
